Hi,

My name is Kosta Kondratenko and I run a website called Sunlight.Quest - <https://sunlight.quest>.

It focuses on thing around the Gold Coast and recently a person named Isaac J Ramsden has come to my attention for doing a setup on a member of the community named Adam Watson - he has used a fake driver's license to attempt to lure Adam and then extort him for money etc.

The full editorial is created below:

<https://sunlight.quest/episode-6>

I wanted to get confirmation from John Ramsden if this is indeed his son - and if he could provide a commentary on the version of the website as it stands and give his view so I can publish it to the website - I'm quite concerned about the prevalence of the fraud of nominating other people for speeding fines etc. - and the fact that a Managing Partner of a major legal firm has a son who is manipulating/creating fake driver's licenses is very concerning to me.

Also my internal investigations have revealed that the deposits that Isaac is requesting are going to Isaac's mother's account - which leads to me questioning the integrity of the security of Ramsden Lawyer's clients.

I am cc'ing John Ramsden into this and if you could get back to me with an official statement I would be happy to publish this on the website - alternatively I will simply state that you have chosen to make no comment and if that is the case please let me know as well.

Also I am in the process of creating a pamphlet for a Community Safety announcement which you can find below:

https://sunlightquest.s3.ap-southeast-2.amazonaws.com/isaac_ramsden/report_here.pdf

Look forward to hearing from you and getting a statement from John Ramsden on this before I proceed to the next step.

Kind Regards,

Kosta Kondratenko
